

Technical Data Sheet | BB1T

Overflow Tray | For use with BB1 and BB1C

The overflow/decanting tray is an essential accessory designed to complement IBC spill pallets BB1 and BB1C, providing an additional layer of containment to prevent leaks and drips from reaching the floor or entering drains.

Product Specifications

External Dimensions (WxLxH)	550x 540 x 928mm
Unit Weight	Approx. 9.5kg
Sump	86tr
Stacking Height	1947mm

Product Features and Benefits

- Attaches securely to the top edge of BB1 or BB1C spill pallets, creating a dispensing area to catch any leaks or drips during operations.
- Ensures safety by channeling excess liquid back into the main sump of the spill pallet, maintaining a clean and hazard-free workspace.
- Manufactured from medium density polyethylene.
- UV stabilised.
- Easy to clean, simplifying maintenance and ensuring a hygienic working environment.
